Abe, K., see Hiyama, S. (124) 118
Adams, J.C., see Stanković, K.M. (124) 191
Afman, C.E., see Kaltenbach, J.A. (124) 78
Alper, S.L., see Stanković, K.M. (124) 191
Altschuler, R., see Ylikoski, J. (124) 17

Bagger-Sjöbäck, D., see Erichsen, S. (124) 146
Bahadori, R.S., see Bohne, B.A. (124) 132
Bohne, B.A., Maghami, E.G., Bahadori, R.S. and Harding, G.W.
The role of micro-noise trauma in the etiology of aging-related changes in the inner ear (124) 132
Brown, D., see Stanković, K.M. (124) 191

Campbell, K.C.M., see Meech, R.P. (124) 44
Chatterjee, M., and Zwislocki, J.J.
Cochlear mechanisms of frequency and intensity coding. II. Dynamic range and the code for loudness (124) 170
Clock Eddins, A., Salvi, R.J., Wang, J. and Powers, N.L.
Threshold-duration functions of chinchilla auditory nerve fibers (124) 190
Collet, L., see Maison, S. (124) 193
Curtis, L.M., see Erichsen, S. (124) 146

Dallos, P., see Edge, R.M. (124) 1
Duncan, R.K., Dyce, O.H. and Saunders, J.C.
Low calcium abolishes tip links and alters relative stereocilia motion in chick cochlear hair cells (124) 69
Dyce, O.H., see Duncan, R.K. (124) 69

Edge, R.M., Evans, B.N., Pearce, M., Richter, C.-P., Hu, X. and Dallos, P.
Morphology of the unfixed cochlea (124) 1
Erichsen, S., Stierna, P., Bagger-Sjöbäck, D., Curtis, L.M., Rarey, K.E., Schmid, W. and Hultcrantz, M.
Distribution of Na,K-ATPase is normal in the inner ear of a mouse with a null mutation of the glucocorticoid receptor (124) 146
Evans, B.N., see Edge, R.M. (124) 1

Fukuda, S., see Hiyama, S. (124) 118

Ghanem, T.A., Rabbitt, R.D. and Tresco, P.A.
Three-dimensional reconstruction of the membranous vestibular labyrinth in the toadfish, *Opsanus tau* (124) 27
Godfrey, D.A., see Kaltenbach, J.A. (124) 78

Harding, G.W., see Bohne, B.A. (124) 132
Henson Jr., O.W., see Xie, D.-H. (124) 60
Hiyama, S., Abe, K., Mikuni, H., Fukuda, S. and Inuyama, Y.
Type A fibril of the mouse tectorial membrane shows D-periodicity: an atomic force microscopic examination (124) 118
Hu, X., see Edge, R.M. (124) 1
Hughes, L.P., see Meech, R.P. (124) 44
Huizing, E.H., see Stengs, C.H.M. (124) 99
Huizing, E.H., see Stengs, C.H.M. (124) 108
Hultcrantz, M., see Stenberg, A.E. (124) 85
Hultcrantz, M., see Erichsen, S. (124) 146

Ikeda, K., see Tateda, M. (124) 91
Inuyama, Y., see Hiyama, S. (124) 118

Kaltenbach, J.A., Godfrey, D.A., Neumann, J.B., McCaslin, D.L., Afman, C.E. and Zhang, J.
Changes in spontaneous neural activity in the dorsal cochlear nucleus following exposure to intense sound: relation to threshold shift (124) 78
Klis, S.F.L., see Stengs, C.H.M. (124) 99
Klis, S.F.L., see Stengs, C.H.M. (124) 108
Krumbholz, K., and Wiegrebe, L.
Detection thresholds for brief sounds - are they a measure of auditory intensity integration? (124) 155

Liang, X.-Q., see Ylikoski, J. (124) 17

Magal, E., see Ylikoski, J. (124) 17
Maghami, E.G., see Bohne, B.A. (124) 132
Maison, S., Micheyl, C. and Collet, L.
Corrigendum to "Contralateral frequency-modulated tones suppress transient-evoked otoacoustic emissions in humans" [Hear. Res. 117 (1998) 114-118] (124) 193
McCaslin, D.L., see Kaltenbach, J.A. (124) 78
Meech, R.P., Campbell, K.C.M., Hughes, L.P. and Rybak, L.P.
A semiquantitative analysis of the effects of cisplatin on the rat stria vascularis (124) 44
Micheyl, C., see Maison, S. (124) 193
Mikuni, H., see Hiyama, S. (124) 118
Miller, J.M., see Ylikoski, J. (124) 17
Mountain, D.C., see Naidu, R.C. (124) 124
Murnane, O.D., Prieve, B.A. and Relkin, E.M.
Recovery of the human compound action potential following prior stimulation (124) 182

Naidu, R.C., and Mountain, D.C.
Measurements of the stiffness map challenge a basic tenet of cochlear theories (124) 124
Neumann, J.B., see Kaltenbach, J.A. (124) 78
Nylén, O., see Stenberg, A.E. (124) 85

Pearce, M., see Edge, R.M. (124) 1
Pirvola, U., see Ylikoski, J. (124) 17
Powers, N.L., see Clock Eddins, A. (124) 190
Prieve, B.A., see Murnane, O.D. (124) 182

Rabbitt, R.D., see Ghanem, T.A. (124) 27
Rarey, K.E., see Erichsen, S. (124) 146

Relkin, E.M., see Murnane, O.D. (124) 182
Richter, C.-P., see Edge, R.M. (124) 1
Rybak, L.P., see Meech, R.P. (124) 44

Saarma, M., see Ylikoski, J. (124) 17
Salvi, R.J., see Clock Eddins, A. (124) 190
Saunders, J.C., see Duncan, R.K. (124) 69
Schmid, W., see Erichsen, S. (124) 146
Smoorenburg, G.F., see Stengs, C.H.M. (124) 108
Smoorenburg, G.F., see Stengs, C.H.M. (124) 99
Stanković, K.M., Brown, D., Alper, S.L. and Adams, J.C.
Erratum to "Localization of pH regulating proteins $H^+$ATPase and $Cl^-/HCO^-_3$ exchanger in the guinea pig inner ear" [Hearing Research 114 (1997) 21-34] (124) 191
Stenberg, A.E., Nylén, O., Windh, M. and Hultcrantz, M.
Otological problems in children with Turner's syndrome (124) 85
Stengs, C.H.M., Klis, S.F.L., Huizing, E.H. and Smoorenburg, G.F.
Protective effects of a neurotrophic $ACTH_{(4-9)}$ analog on cisplatin ototoxicity in relation to the cisplatin dose: an electrocochleographic study in albino guinea pigs (124) 108
Stengs, C.H.M., Klis, S.F.L., Huizing, E.H. and Smoorenburg, G.F.
Cisplatin ototoxicity. An electrophysiological dose-effect study in albino guinea pigs (124) 99
Stierna, P., see Erichsen, S. (124) 146
Suvanto, P., see Ylikoski, J. (124) 17
Suzuki, H., see Tateda, M. (124) 91

Takasaka, T., see Tateda, M. (124) 91
Tateda, M., Suzuki, H., Ikeda, K. and Takasaka, T.
pH regulation of the globular substance in the otoconial membrane of the guinea-pig inner ear (124) 91
Tresco, P.A., see Ghanem, T.A. (124) 27

Virkkala, J., see Ylikoski, J. (124) 17

Wang, J., see Clock Eddins, A. (124) 190
Wiegrebe, L., see Krumbholz, K. (124) 155
Windh, M., see Stenberg, A.E. (124) 85

Xie, D.-H., and Henson Jr., O.W.
Tonic efferent-induced cochlear damping in roosting and echolocating mustached bats (124) 60

Ylikoski, J., Pirvola, U., Virkkala, J., Suvanto, P., Liang, X.-Q., Magal, E., Altschuler, R., Miller, J.M. and Saarma, M.
Guinea pig auditory neurons are protected by glial cell line-derived growth factor from degeneration after noise trauma (124) 17

Zhang, J., see Kaltenbach, J.A. (124) 78
Zwislocki, J.J., see Chatterjee, M. (124) 170

HEARING RESEARCH

# Subject Index Volume 124

**Aging-related cochlear damage**
Chinchilla; Noise; Presbycusis (Bohne, B.A. (124) 132)

**Anatomy**
Hemicochlea; Tissue fixation; Basilar membrane; Tectorial membrane; Organ of Corti; Calcium; Cochlea (Edge, R.M. (124) 1)

**Atomic force microscopy**
Tectorial membrane; Type II collagen; Inner ear (Hiyama, S. (124) 118)

**Auditory**
Chick; Stereocilium; Micromechanics; Calcium; Tip link (Duncan, R.K. (124) 69)

Dynamic range; Hair cell; Loudness (Chatterjee, M. (124) 170)

**Basilar membrane**
Hemicochlea; Anatomy; Tissue fixation; Tectorial membrane; Organ of Corti; Calcium; Cochlea (Edge, R.M. (124) 1)

**Bat**
Efferent; Medial olivocochlear; Cochlea; Vocalization (Xie, D.-H. (124) 60)

**Calcium**
Hemicochlea; Anatomy; Tissue fixation; Basilar membrane; Tectorial membrane; Organ of Corti; Cochlea (Edge, R.M. (124) 1)

Auditory; Chick; Stereocilium; Micromechanics; Tip link (Duncan, R.K. (124) 69)

**Chick**
Auditory; Stereocilium; Micromechanics; Calcium; Tip link (Duncan, R.K. (124) 69)

**Child**
Turner's syndrome; Tympanic membrane pathology; Hearing impairment; Karyotype; Otitis media (Stenberg, A.E. (124) 85)

**Chinchilla**
Aging-related cochlear damage; Noise; Presbycusis (Bohne, B.A. (124) 132)

**Cisplatin**
Stria vascularis; Ototoxicity; Semiquantitative analysis (Meech, R.P. (124) 44)

Guinea pig; Compound action potential; Cochlear microphonics; Summating potential; Ototoxicity (Stengs, C.H.M. (124) 99)

Guinea pig; Compound action potential; Cochlear microphonics; Summating potential; Ototoxicity; Prophylaxis (Stengs, C.H.M. (124) 108)

**Cochlea**
Hemicochlea; Anatomy; Tissue fixation; Basilar membrane; Tectorial membrane; Organ of Corti; Calcium (Edge, R.M. (124) 1)

Efferent; Medial olivocochlear; Bat; Vocalization (Xie, D.-H. (124) 60)

Gerbil; Partition stiffness; Stiffness gradient; Frequency map (Naidu, R.C. (124) 124)

Cisplatin; Guinea pig; Compound action potential; Summating potential; Ototoxicity (Stengs, C.H.M. (124) 99)

Cisplatin; Guinea pig; Compound action potential; Summating potential; Ototoxicity; Prophylaxis (Stengs, C.H.M. (124) 108)

**Cochlear nucleus**
Plasticity; Spontaneous activity; Tinnitus; Noise-induced hearing loss; Hamster (Kaltenbach, J.A. (124) 78)

**Compound action potential**
Cisplatin; Guinea pig; Cochlear microphonics; Summating potential; Ototoxicity (Stengs, C.H.M. (124) 99)

Cisplatin; Guinea pig; Cochlear microphonics; Summating potential; Ototoxicity; Prophylaxis (Stengs, C.H.M. (124) 108)

Forward masking; Recovery; Spontaneous rate; Human (Murnane, O.D. (124) 182)

**Confocal laser microscope**
Globular substance; $pH_i$; $Na^+$-$H^+$ exchange; Otoconial formation (Tateda, M. (124) 91)

**Decay time of auditory filter**
Intensity integration; Temporal interference; Matched filter (Krumbholz, K. (124) 155)

**Dissociated cochlear neuron**
Glial cell line-derived neurotrophic factor; Infusion therapy; Noise damage; In situ hybridization (Ylikoski, J. (124) 17)

**Dynamic range**
Hair cell; Auditory nerve; Loudness (Chatterjee, M. (124) 170)

**Efferent**
Medial olivocochlear; Bat; Cochlea; Vocalization (Xie, D.-H. (124) 60)

**Forward masking**
Compound action potential; Recovery; Spontaneous rate; Human (Murnane, O.D. (124) 182)

**Frequency map**
Gerbil; Cochlea; Partition stiffness; Stiffness gradient (Naidu, R.C. (124) 124)

**Gerbil**
Cochlea; Partition stiffness; Stiffness gradient; Frequency map (Naidu, R.C. (124) 124)

**Glial cell line-derived neurotrophic factor**
Dissociated cochlear neuron; Infusion therapy; Noise damage; In situ hybridization (Ylikoski, J. (124) 17)

**Globular substance**
$pH_i$; Confocal laser microscope; $Na^+$-$H^+$ exchange; Otoconial formation (Tateda, M. (124) 91)

**Glucocorticoid receptor**
Immunohistochemistry; Inner ear; Mouse; Na,K-ATPase; Homologous recombination (Erichsen, S. (124) 146)

**Guinea pig**
Cisplatin; Compound action potential; Cochlear microphonics; Summating potential; Ototoxicity (Stengs, C.H.M. (124) 99)

Cisplatin; Compound action potential; Cochlear microphonics; Summating potential; Ototoxicity; Prophylaxis (Stengs, C.H.M. (124) 108)

**Hair cell**
Dynamic range; Auditory nerve; Loudness (Chatterjee, M. (124) 170)

**Hamster**
Plasticity; Spontaneous activity; Tinnitus; Cochlear nucleus; Noise-induced hearing loss (Kaltenbach, J.A. (124) 78)

**Hearing impairment**
Turner's syndrome; Tympanic membrane pathology; Child; Karyotype; Otitis media (Stenberg, A.E. (124) 85)

**Hemicochlea**
Anatomy; Tissue fixation; Basilar membrane; Tectorial membrane; Organ of Corti; Calcium; Cochlea (Edge, R.M. (124) 1)

**Homologous recombination**
Immunohistochemistry; Inner ear; Mouse; Glucocorticoid receptor; Na,K-ATPase (Erichsen, S. (124) 146)

**Human**
Compound action potential; Forward masking; Recovery; Spontaneous rate (Murnane, O.D. (124) 182)

**Immunohistochemistry**
Inner ear; Mouse; Glucocorticoid receptor; Na,K-ATPase; Homologous recombination (Erichsen, S. (124) 146)

**In situ hybridization**
Glial cell line-derived neurotrophic factor; Dissociated cochlear neuron; Infusion therapy; Noise damage (Ylikoski, J. (124) 17)

**Infusion therapy**
Glial cell line-derived neurotrophic factor; Dissociated cochlear neuron; Noise damage; In situ hybridization (Ylikoski, J. (124) 17)

**Inner ear**
Immunohistochemistry; Mouse; Glucocorticoid receptor; Na,K-ATPase; Homologous recombination (Erichsen, S. (124) 146)

Tectorial membrane; Type II collagen; Atomic force microscopy (Hiyama, S. (124) 118)

**Intensity integration**
Temporal interference; Decay time of auditory filter; Matched filter (Krumbholz, K. (124) 155)

**Karyotype**
Turner's syndrome; Tympanic membrane pathology; Child; Hearing impairment; Otitis media (Stenberg, A.E. (124) 85)

**Loudness**
Dynamic range; Hair cell; Auditory nerve (Chatterjee, M. (124) 170)

**Matched filter**
Intensity integration; Temporal interference; Decay time of auditory filter (Krumbholz, K. (124) 155)

**Medial olivocochlear**
Efferent; Bat; Cochlea; Vocalization (Xie, D.-H. (124) 60)

**Micromechanics**
Auditory; Chick; Stereocilium; Calcium; Tip link (Duncan, R.K. (124) 69)

**Morphology vestibular labyrinth**
Three-dimensional reconstruction; Toadfish (Ghanem, T.A. (124) 27)

**Mouse**
Immunohistochemistry; Inner ear; Glucocorticoid receptor; Na,K-ATPase; Homologous recombination (Erichsen, S. (124) 146)

**$Na^+$-$H^+$ exchange**
Globular substance; $pH_i$; Confocal laser microscope; Otoconial formation (Tateda, M. (124) 91)

**Na,K-ATPase**
Immunohistochemistry; Inner ear; Mouse; Glucocorticoid receptor; Homologous recombination (Erichsen, S. (124) 146)

**Noise**
Chinchilla; Aging-related cochlear damage; Presbycusis (Bohne, B.A. (124) 132)

Glial cell line-derived neurotrophic factor; Dissociated cochlear neuron; Infusion therapy; In situ hybridization (Ylikoski, J. (124) 17)

**Noise-induced hearing loss**
Plasticity; Spontaneous activity; Tinnitus; Cochlear nucleus; Hamster (Kaltenbach, J.A. (124) 78)

**Organ of Corti**
Hemicochlea; Anatomy; Tissue fixation; Basilar membrane; Tectorial membrane; Calcium; Cochlea (Edge, R.M. (124) 1)

**Otitis media**
Turner's syndrome; Tympanic membrane pathology; Child; Hearing impairment; Karyotype (Stenberg, A.E. (124) 85)

**Otoconial formation**
Globular substance; $pH_i$; Confocal laser microscope; $Na^+$-$H^+$ exchange (Tateda, M. (124) 91)

**Ototoxicity**
Cisplatin; Stria vascularis; Semiquantitative analysis (Meech, R.P. (124) 44)

Cisplatin; Guinea pig; Compound action potential; Cochlear microphonics; Summating potential (Stengs, C.H.M. (124) 99)

Cisplatin; Guinea pig; Compound action potential; Cochlear microphonics; Summating potential; Prophylaxis (Stengs, C.H.M. (124) 108)

**Partition stiffness**
Gerbil; Cochlea; Stiffness gradient; Frequency map (Naidu, R.C. (124) 124)

**$pH_i$**
Globular substance; Confocal laser microscope; $Na^+$-$H^+$ exchange; Otoconial formation (Tateda, M. (124) 91)

**Plasticity**
Spontaneous activity; Tinnitus; Cochlear nucleus; Noise-induced hearing loss; Hamster (Kaltenbach, J.A. (124) 78)

**Presbycusis**
Chinchilla; Aging-related cochlear damage; Noise (Bohne, B.A. (124) 132)

**Prophylaxis**
Cisplatin; Guinea pig; Compound action potential; Cochlear microphonics; Summating potential; Ototoxicity (Stengs, C.H.M. (124) 108)

**Recovery**
Compound action potential; Forward masking; Spontaneous rate; Human (Murnane, O.D. (124) 182)

**Semiquantitative analysis**
Cisplatin; Stria vascularis; Ototoxicity (Meech, R.P. (124) 44)

**Spontaneous activity**
Plasticity; Tinnitus; Cochlear nucleus; Noise-induced hearing loss; Hamster (Kaltenbach, J.A. (124) 78)

**Spontaneous rate**
Compound action potential; Forward masking; Recovery; Human (Murnane, O.D. (124) 182)

**Stereocilium**
Auditory; Chick; Micromechanics; Calcium; Tip link (Duncan, R.K. (124) 69)

**Stiffness gradient**
Gerbil; Cochlea; Partition stiffness; Frequency map (Naidu, R.C. (124) 124)

**Stria vascularis**
Cisplatin; Ototoxicity; Semiquantitative analysis (Meech, R.P. (124) 44)

**Summating potential**
Cisplatin; Guinea pig; Compound action potential; Cochlear microphonics; Ototoxicity (Stengs, C.H.M. (124) 99)

Cisplatin; Guinea pig; Compound action potential; Cochlear microphonics; Ototoxicity; Prophylaxis (Stengs, C.H.M. (124) 108)

**Tectorial membrane**
Hemicochlea; Anatomy; Tissue fixation; Basilar membrane; Organ of Corti; Calcium; Cochlea (Edge, R.M. (124) 1)

Type II collagen; Atomic force microscopy; Inner ear (Hiyama, S. (124) 118)

**Temporal interference**
Intensity integration; Decay time of auditory filter; Matched filter (Krumbholz, K. (124) 155)

**Three-dimensional reconstruction**
Morphology vestibular labyrinth; Toadfish (Ghanem, T.A. (124) 27)

**Tinnitus**
Plasticity; Spontaneous activity; Cochlear nucleus; Noise-induced hearing loss; Hamster (Kaltenbach, J.A. (124) 78)

**Tip link**
Auditory; Chick; Stereocilium; Micromechanics; Calcium (Duncan, R.K. (124) 69)

**Tissue fixation**
Hemicochlea; Anatomy; Basilar membrane; Tectorial membrane; Organ of Corti; Calcium; Cochlea (Edge, R.M. (124) 1)

**Toadfish**
Three-dimensional reconstruction; Morphology vestibular labyrinth (Ghanem, T.A. (124) 27)

**Turner's syndrome**
Tympanic membrane pathology; Child; Hearing impairment; Karyotype; Otitis media (Stenberg, A.E. (124) 85)

**Tympanic membrane pathology**
Turner's syndrome; Child; Hearing impairment; Karyotype; Otitis media (Stenberg, A.E. (124) 85)

**Type II collagen**
Tectorial membrane; Atomic force microscopy; Inner ear (Hiyama, S. (124) 118)

**Vocalization**
Efferent; Medial olivocochlear; Bat; Cochlea (Xie, D.-H. (124) 60)
